ABIDE I rs-fMRI
871 resting-state scans
DATA INTAKE
QC-passed scans, 360 ROIs
SUBJECT SPLIT
train / validation / test
SLIDING WINDOWS
30 TR window, stride 10
GRAPH BUILD
signed correlation, top 20% edges
SUBGRAPH TRACKING
20 seed ROIs, 1-hop
GRAPH ENCODING
GIN, 128-D embedding
TEMPORAL PREDICTION
GRU, trained on controls
ANOMALY SCORING
next-embedding error
THRESHOLD CALIBRATION
95th percentile, validation controls
ANOMALY GENERATION
gradient-guided edge edits
GENERATION CHECKS
range tests, random baseline
FEW-SHOT ADAPTATION
ASD scans + generated anomalies
DETECTION
subject score vs. threshold
SEVERITY ESTIMATION
ADOS-based bands
OUTPUT
flag + severity band
uses train-control scans
uses validation controls only
uses ASD support scans
uses test scans (final output only)
uses severity labels
no labels used
